N. Dean Sapp

QUALIFICATIONS

- Seasoned Information Technology, Security, Risk, Privacy and Compliance leader.
- Visionary security thought leader and relationship builder.
- Solid business acumen, punctual, thoughtful, persuasive, and professional.
- Extensive experience building information security, compliance, and privacy teams.
- Skilled at providing insightful security leadership and reducing enterprise business risks.
- Extremely self-motivated, diligent, pragmatic and results/goal oriented.
- Extensive experience reviewing security controls and testing implementations.
- Demonstrated skill communicating complex security concepts to executive management and clients.
- Skilled negotiator.
- Very capable talent scout and recruiter.
- Highly technical security practitioner with extensive hands-on skills.
- Extremely skilled at creating meaningful information security metrics and dashboards for executives.
- Security researcher, author, and talented public speaker.

EXPERIENCE

Chief Information Security Officer – Data Protection Officer　　　　**November 2019 – Present**
FILEVINE, INC.　　　　SALT LAKE CITY, UTAH

- Protected cloud based digital assets, employees, and physical facilities for multiple locations, 500+ employees and Filevine's intellectual property for Filevine and its' subsidiaries with revenues exceeding $40MM.
- Lead the Information Security, Information Technology, IT Audit, Risk and Compliance teams supporting an explosively fast-growing SaaS case management platform supporting over 40,000 legal practitioners.
- Hired, trained, and built a team of high performing IT, IS and physical security experts to protect the business and our clients from reputational harm or a material data breach.
- Lead efforts to aid the business with contractual, regulatory or compliance obligations pertaining to CCPA, CPRA, GDPR, PCI DSS, HIPAA, SOC 2 Type II, FedRAMP, StateRAMP and CJIS Security Policy 5.9.2
- Built a third-party risk management (3PRM) program to assess more than 250 vendors to ensure they were accountable for cyber security requirements.
- Drafted or re-wrote numerous security policies, procedures, play books, and security program documentation.
- Implemented an industry recognized Governance, Risk and Compliance (GRC) toolset.
- Performed technical review, architectural design feedback and implementation recommendations for development efforts to enhance the Software Development Lifecycle (SDLC) and ensure OWASP top 10 best practices were followed.
- Generated business requirements, completed vendor selection, negotiated contractual and budgetary requirements, completed purchasing and scheduling implementation efforts for numerous enterprise security tools including but not limited to the following: Identity & Access Management (IAM), Multi Factor Authentication (MFA), enterprise logging, Endpoint Detection and Prevention (EDR), Data Loss Prevention (DLP), Email security tools, Web Application Firewalls (WAF) Intrusion Detection (IDS) and Intrusion Prevention (IPS), Firewalls, AWS security tools, Dynamic Application Scanning (DAST), Static Application Scanning (SAST) and other enterprise security tools.
- Prepared the IS, IT, Facilities and Audit budgets with associated business plans and business cases including supporting tactical and strategic investments for the IT, Facilities and IS programs.
- Developed a proven maturity model and risk-based security control strategy to prevent a significant audit failure, compliance violation or material data breach.
- Assisted customers with Incident Response (IR) efforts to recover financial losses from Business Email Compromise (BEC), Wire Fraud, Electronic Funds Transfer fraud, ransomware, and other threat vectors.
- Built an automated risk assessment and compliance framework into the Filevine platform to provide customers with a low-cost solution for enterprise governance, risk management and compliance efforts.
- Lead the business through successful ISO 27001, 27017 and 27018 audits for various product lines and built the underlying relationship, processes, and security program deliverables in nine months.
- Negotiated numerous client contracts, RFPs and RFIs with government CSO's and business units to ensure requisite security controls were included and effective.

N. Dean Sapp

Chief Information Security Officer   **February 2019 – November 2019**
PROGREXION HOLDINGS   SALT LAKE CITY, UTAH

- Served as the CISO for a large consumer finance company with 12 locations, five large business units, 4000+ employees and annual revenues of approximately $500MM.
- Provided executive leadership and mentoring to the business stakeholders to assist with decision-making and to create a five-year technology roadmap.
- Reduced EBITDA impact to the business by more than $1MM, while converting subscription services to perpetual licensing models for strategic security investments.
- Negotiated contracts and compensating controls for regulators and auditors, reducing financial impact to the business by over $4MM in 2019.
- Built a comprehensive information security program to manage cyber security risks while complying with regulatory requirements from the PCI Council, three large credit bureaus, the FTC, CFPB, GDPR, CCPA, GLBA, NYDFS and numerous third-party partners and suppliers.
- Drafted business plan "One-Sheet(s)" and detailed business cases including financial analysis with five-year EBITDA impact for the Executive Steering Committee (ESC) to evaluate both tactical and strategic investments for the information security program.
- Adopted CIS Critical Controls as an interim security framework to avoid a data breach event, while working ISO 27001 compliance objectives.
- Lead a team of nine cyber security professionals and managed a budget of $3MM+ annually.
- Implemented a robust hiring and training program to select and onboard seasoned cyber security resources to backfill vacancy and for new positions.
- Built a Third-Party vendor risk management program to assess and ensure all third parties were accountable for cyber security requirements.
- Negotiated numerous contracts with the three large credit bureaus and several other service providers to ensure requisite security controls were included and effective.
- Directed data governance, compliance, privacy, and information security initiatives.
- Ensured compliance program deliverables were completed on time and without significant findings.
- Helped the business to avoid a significant data breach, compliance failure or audit deficiency.

Chief Information Security Officer   **June 2016 – February 2019**
BRAINTRACE, INC. (AQUIRED BY SOPHOS 7/22/21)   SALT LAKE CITY, UTAH

- Served as the CISO, CPO and CRO for a managed security service provider (MSSP) focusing on delivering cost-effective and comprehensive cybersecurity services to our clients.
- Built a full-service information security, privacy, compliance, incident response and MSSP from the ground up with a valuation of approximately $50MM in less than three years.
- Provided virtual CISO, CPO and CRO consulting services to a wide variety of clients including but not limited to large law firms, health care and bio-med providers, translation companies, DoD sub-contractors, SaaS providers and many other businesses across a wide spectrum of market verticals.
- Developed internal security services offerings in-line with CIS Critical Controls to assist customers with understanding and managing security risks in a practical and cost-effective way.
- Created comprehensive information security policies, procedures, data governance and privacy initiative for clients and internal business units.
- Delivered security training and dozens of lectures to professional organizations outlining the needs to utilize reasonable and effective cybersecurity controls in their environments to manage risks and profit volatility resulting from cyber events.
- Provided health care specific security consulting services pertaining to HIPAA/HITECH, HealthIT.gov best practices, FDA Title 21 CFR part 11, Omnibus Rule 2013, OCR Security Rule Compliance guidelines, the NIST Cybersecurity Framework, and other related regulatory and compliance standards.
- Provided security consulting and risk management services for clients pertaining to ISO 27001, PCI DSS, GDPR, NIST 800-53, NIST 800-171, NIST 800-30, NYDFS, CIS 20 and other security standards.
- Delivered Incident Response and Breach Response services for numerous clients.
- Continued serving as a senior security consultant for the firm on critical cases as requested.

N. Dean Sapp

Virtual Chief Information Security Officer   **October 2007 – Present**
IT SECURITY MATTERS, LLC (SECURITY CONSULTING BUSINESS)   SALT LAKE CITY, UTAH

- Developed an engagement-based security consultant business specializing in risk assessment and risk mitigation for clients in the financial, legal, and medical verticals.
- Performed security assessments for large universities and non-profits.
- Performed the duties of a virtual CISO for Portoformia.com and other clients.
- Provided security consulting services for large regional law firms in California, Utah, and Florida.
- Provided security consulting services to several Board of Directors and VC firms in the US.
- Provided expert witness and technical consulting services for legal firms representing clients that were victims of data breaches or fraud losses.
- Provided incident response and consulting services for numerous clients to respond to security breaches and incidents including building defenses against nation state actors.

Director of Information Security   **June 2015 – June 2016**
PROGRESSIVE LEASING   DRAPER, UTAH

- Provided CISO duties for a billion-dollar consumer financial corporation providing comprehensive compliance, privacy, architecture, risk management, data protection, and physical security services.
- Provided executive leadership with budgetary requirements, prioritized security projects and investments needed to manage current and future audit, security, and compliance risks.
- Hired and trained a team of ten dedicated information security and compliance experts and managed a budget of over $2MM annually.
- Built a comprehensive information security program to manage cyber security risks while complying with regulatory requirements from the PCI council, the FTC, and to comply with KYC, FCRA, TCPA, GLBA, NYDFS and numerous third parties.
- Created and implemented a robust enterprise security vision with incremental maturity levels based on risk tolerance and threats from breach or compliance failures.
- Partnered with the Office of General Counsel and Privacy Office to ensure new applications and solutions were delivered with relevant legal implications in mind.
- Ensured the business was PCI DSS 3.2 compliant and successfully passed their initial SOX audit without any material findings in less than twelve months.

Senior Information Security & Risk Manager   **April 2008 – June 2015**
CORPORATION OF THE PRESIDING BISHOPRIC – ICS   SALT LAKE CITY, UTAH

- Provided vCISO services for nine large lines of business with a team of 80+ security professionals.
- Provided security and privacy consulting for a large, private health benefits, retirement, and insurance company that functioned as a HIPAA covered entity and to ensure PHI and sensitive PII were properly protected.
- Performed numerous data center security assessments and reviews for mission-critical infrastructure systems including SCADA security implications.
- Provided risk-based maturity models and guidance for security program development, compliance obligations, incident management, data governance, and data protection services.
- Recruited, hired, and trained information security, risk, and compliance team members.
- Established clear and actionable risk-based information security business plans with corresponding security KPIs and dashboard metrics to measure, identify and manage significant enterprise risks.
- Managed a team of senior information security risk analysts and business intelligence engineers to build impactful, repeatable risk management processes and cutting-edge executive reporting capabilities.
- Provided application security testing and Red Team services for dozens of application development projects and advised business stakeholders of the risks of poorly written and secured web and thick client applications including remediation best practices in-line with the OWASP top 10.

N. Dean Sapp

IT Security Manager / Security Engineer   **March 2000 – April 2008**
AKERMAN SENTERFITT – INFORMATION TECHNOLOGY   ORLANDO, FLORIDA

- Performed as the CISO for a full-service corporate law firm and created a comprehensive security program to identify and manage business risks.
- Served as the project manager for a large Disaster Recovery/Business Continuity Plan (DR/BCP) project incorporating two data center buildouts.
- Proposed and received funding for security initiatives and projects exceeding 500K annually.
- Prepared and implemented security guidelines, access standards, and security policy governance for the firm based on ISO 17799/2700X, COBIT and ITIL standards.
- Directed or performed numerous internal, client requested security audits.
- Researched and identified necessary HIPAA, GLB and SB 1386 compliance policies for the CTO.
- Functioned as the security liaison between the CTO, HR Director, Executive Director, and other IT Directors to ensure all new initiatives include reasonable security controls to reduce firm risk.

EDUCATION

Master of Science in Information Security Management (MSISM) #19 worldwide   **October 2018**
SANS TECHNOLOGY INSTITUTE   BETHESDA, MARYLAND

Major: Information Security Management

Bachelor of Science in General Studies   **December 2007**
BRIGHAM YOUNG UNIVERSITY – MARRIOTT SCHOOL OF MANAGEMENT   PROVO, UTAH

Department of Independent Studies
Major: Management
